Real Push Check on debug-apk-1.8: Results

v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 9 Nov 2026, 16:06–16:23 PKT on debug-apk-1.8, hosted backend with real push (live since 15:40) · Ali on Sarim's phone, Ammi on his second Android phone, receiving app fully closed

4 / 9	1	4	F-16
passed	partial	failed	fixed (server)

1. Summary

Real push works: ICP-3 F-16 (Critical, backend) is fixed on the server. With the receiving app closed, the Panic, the "Panic alert closed" notice, the remote alarm and a text message all reached the other phone within 1–2 seconds. Run on **debug-apk-1.8**, because debug-apk-1.9 cannot reach the server (F-22).

What is left is in the app: the Panic sounds like any notification (**F-23**), the alarm does not ring (**F-13**, fix listed for 1.9), tapping a notification lands on Home (**F-24**), and **calls cannot start at all (F-25, High)**, a field-name mismatch that is still in 1.9. ICP-3 steps 2, 8 and 11, A-05 and the ICP-4 calls are re-run on the rebuilt APK.

2. Results

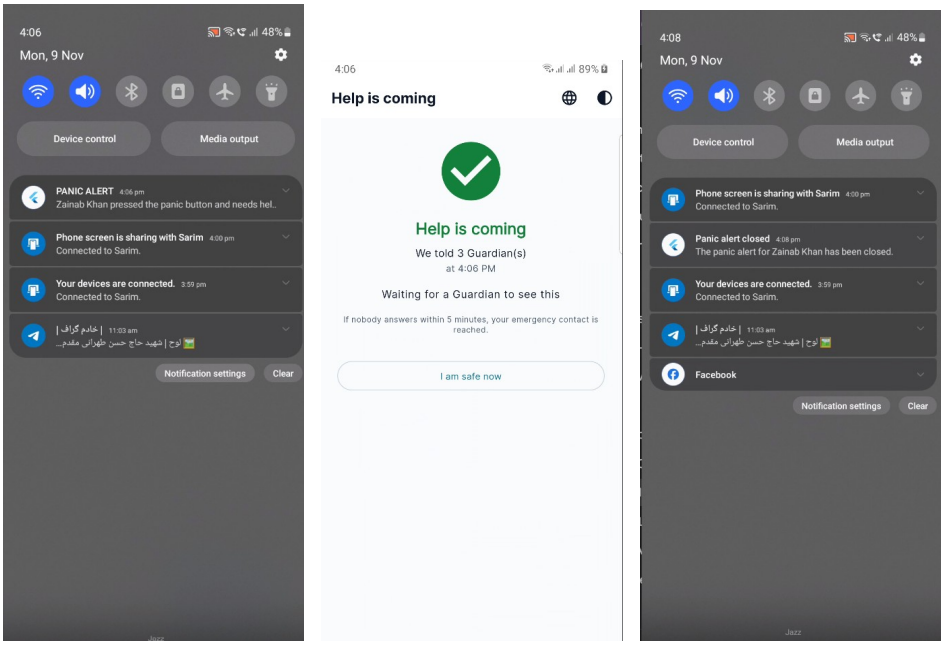

Case	Check	Result	Note
P-1	Panic from Ammi, Ali's app closed (16:06, again 16:14)	PASS	"PANIC ALERT · Zainab Khan pressed the panic button and needs help" on Ali's phone in the same second, both times
P-2	Panic arrives as a critical alert	FAIL	Plays the normal notification sound, same as any app (F-23)
P-3	"Panic alert closed" notice (16:08)	PASS	Arrives on Ali's closed app (standard notices were never shown before: F-12)
A-1	Remote alarm from Ali, Ammi's app closed (16:16)	Partial	"Alarm · Your Guardian is sounding the alarm to find you" arrives instantly, but the phone does not ring: one normal notification sound only (F-13, still open on 1.8)
A-2	Tap the alarm notification	FAIL	Opens Ammi's Home, no alarm screen, no ringing (F-24)
A-3	Stop alarm on Ali	PASS	Alarm stopped
M-1	Message from Ali, Ammi's app closed	PASS	Arrives in 1–2 s with "Ali Khan" and the text (4.10 M-01 was partial before)
M-2	Tap the message notification	FAIL	Opens the chat for a moment, then jumps to Home (F-24)
C-1	Voice call from Ali to Ammi (16:23)	FAIL	"One or more fields are invalid": the call cannot start (F-25)

3. Findings

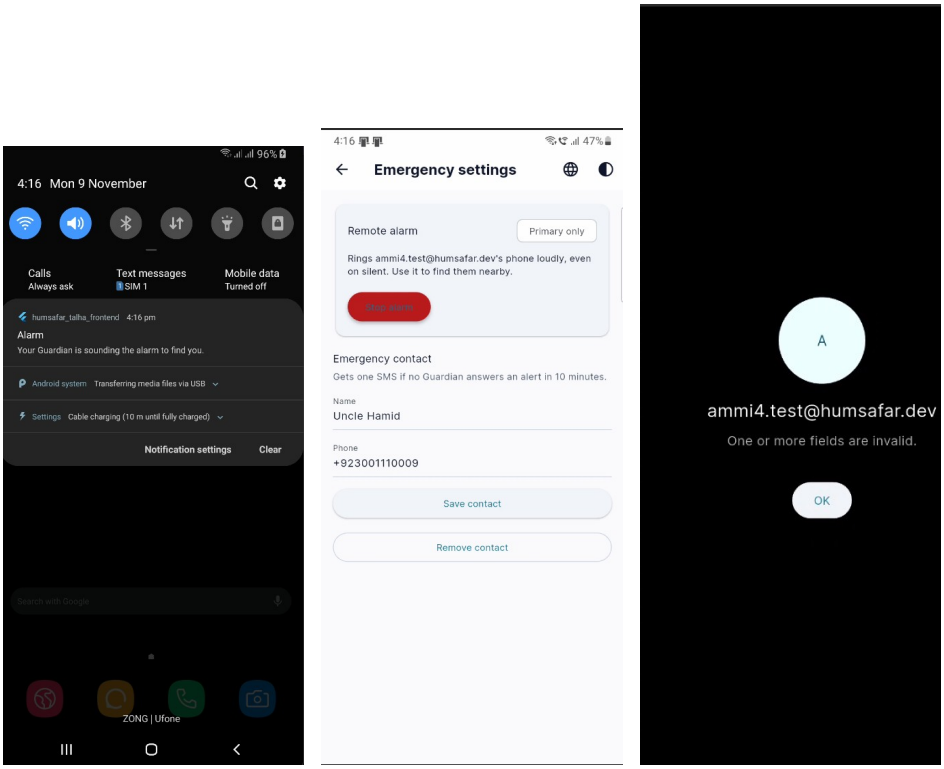

Found on **debug-apk-1.8** with real push. Owner: Frontend (Talha). F-23 to F-25 continue the ICP / general series.

ID	Finding	Sev.	Case	Fix / owner	Status
F-25	Calls cannot start: outgoing_call_screen.dart line 94 sends receiver_id, but POST /calls needs callee_id (call_contract.md, backend schema), so the server answers 422. Still the same in debug-apk-1.9 and on Talha's main (8b3d7f4). Blocks the ICP-4 calls (ZegoCloud free period ends 18 Nov)	High	C-1	Frontend (Talha): send callee_id	Open
F-13	The remote alarm push arrives but the app does not ring when it is closed (one normal notification)	High	A-1	Frontend (Talha): fix listed for 1.9, retest on the rebuilt APK	Open
F-23	Critical alerts (Panic) use the normal notification sound; a Guardian can miss them	Medium	P-2	Frontend (Talha): a high-importance notification channel with an alarm-style sound for critical types (panic, alarm, urgent voice, incoming call); the server already marks them critical	Open
F-24	Tapping a notification does not stay on its screen: the alarm opens Home; a message opens the chat for a moment, then Home	Medium	A-2, M-2	Frontend (Talha): route the tap to the matching screen and stop the start-up redirect to Home	Open
