HUMSAFAR · QA

6.12 Directory & Booking: Results

Task 6.12, directory half · v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 30 Oct 2026 on debug-apk-1.7 against the hosted backend

8 / 18	2	1 + 3	4
cases passed	partial	failed + blocked	not run

1. Summary

The directory half of 6.12 checks the healthcare directory, the home-care providers, visit requests and the shared Activity log (FR-I1, I2, J1–J3) in the real app. **8 of 18 passed, 2 partial, 1 failed, 3 blocked, 4 not run.**

Browsing works: emergency and sample entries, search, calling, Home care with PKR, the contact log (one entry per minute) and the shared Activity log seen by both Ali and the Dependent.

Critical finding (G-01): the app's retry id is not a UUID, so the backend refuses **every visit request, text message, voice message, new medical record and new vitals reading**. Confirmed on the phone for a text message and a visit request. It blocks the rest of this run, 4.10 / ICP-4 and most of 5.10 until Talha's fix in 1.8. The camera half (K-01–K-17) still waits for the camera phone (6.10).

2. Set-up

Item	Detail
Build	Talha's debug-apk-1.7 on Sarim's Android phone; hosted backend.
Accounts	Ali (Primary) on Nasreen (nani2.test); Nani as the Dependent for D-08 / D-16.
Calls	Call buttons were tapped to open the dialer only; no real call was made.
Test cases	docs/qa/Humsafar_QA_6.12_Camera_Directory_Test_Cases_v0.4.pdf, D-01–D-18.

3. Results by case

#	Check	Result	Note
D-01	Emergency help list: national numbers callable, Sample entries not	Partial	Aman, Chhipa, Rescue 1122, Edhi… have Call; Sample entries have none. But the emergency numbers are mixed alphabetically among the demo entries, not grouped at the top (G-03)
D-02	Near me with location allowed	PASS	Asks for location each time it is off; list loads
D-03	List without location	PASS	Loads, no crash, preloaded entries shown
D-04	Search	PASS	"hospital": 3 results; nonsense text: "no results"
D-05	Call on Rescue 1122; Sample / no-phone entries	PASS	Dialer opens with 1122 (no call made); Sample entries without Call
D-06	Home care: filter Nurse, sort by charge, PKR	PASS	2 nurses, PKR 2,500 and 3,000
D-07	Postman: bad charge range / sort	Not run	Postman-only; covered by the backend regression
D-08	Dependent finds the emergency numbers	PASS	Nani: More → Directory & Services → numbers with Call
D-09	Request a visit (wished time + note) → Pending	FAIL	"Please check the details and try again" every time, also with nothing filled in (G-01, G-02)
D-10	Request validation: no time, past, > 1 year, 301-char note	BLOCKED	Every request fails (G-01), so the specific checks cannot be seen
D-11	Second open request for the same provider refused	BLOCKED	Needs a saved request (G-01)
D-12	Weak internet: retry saves once	Not run	Needs a network drop; and blocked by G-01
D-13	Confirm → Completed; cancel; no change after Completed	BLOCKED	Needs a saved request (G-01)
D-14	Sara / Bilal permissions on requests	Not run	Needs Sara with health_records on Ammi; blocked by G-01
D-15	Contact log: two Calls within 60 s logged once	PASS	Two taps at 17:12 → one entry; separate entries at 16:54, 17:07
D-16	Activity log for Ali, Sara and the Dependent; filters	Partial	Ali and Nani both see the 3 Rescue 1122 calls with "Ali Khan" and time. No requests (G-01). No Calls / Requests filter on the screen (G-04)
D-17	Booking notice to Sara	Not run	Needs Sara; blocked by G-01
D-18	No payment step anywhere (FR-J3)	PASS	None in Directory or Home care

4. Findings

Severity: **Critical** a whole feature cannot be used; **High** blocks a core flow; **Medium** hurts a requirement; **Low** minor.

ID	Finding	Sev.	Case	Fix / owner	Status
G-01	The app's retry id (client_id) is not a UUID ("<microseconds>-<random>"); the backend requires a UUID, so every request carrying it gets 422. Confirmed on the phone: a text message shows "Not sent, tap to retry"; a visit request shows "Please check the details". Same code in 5 places	Critical	D-09	Talha: const Uuid().v4() in chat_screen.dart, voice_recorder_sheet.dart, add_record_screen.dart, add_vital_reading_screen.dart, request_visit_screen.dart. Blocks ICP-4, 4.10, 5.10	Open
G-02	Visit request sends preferred_at without a time zone (toIso8601String() on a local time); the backend needs one	High	D-09	Talha: _preferredAt!.toUtc().toIso8601String()	Open
G-03	Emergency numbers (1122, 115, 1020, 15, 16, Aman, Chhipa) are sorted alphabetically among ~20 demo entries instead of grouped at the top as in screen 18	Medium	D-01	Talha: show the national numbers (no position) first, as their own group	Open
G-04	Activity log has no Calls / Requests filter (screen 18d)	Low	D-16	Talha: add the two filter chips	Open

4.1 Related

- **3.16 N-01 (High):** adding a medicine fails (time vs times). Same kind of mismatch; reported together.
- **Why the tests missed it:** the app's automated tests use a fake server that accepts any client_id; only the real backend checks it. A real-device pass of every "save" button is worth doing after 1.8.

5. What is left

Item	Who	When
Fix G-01 and G-02 (with the medicine fix)	Talha	1.8
Re-run D-09 – D-14, D-16 (requests), D-17	Sarim (+ Sara account)	On 1.8
Fix G-03, G-04	Talha	7.5 / polish

Item	Who	When
Camera half K-01 – K-17	Sarim with Talha / Abdullah	After the camera phone (6.10)

After the 1.8 re-run this report goes to v1.1.
