HUMSAFAR · QA

Retest on debug-apk-1.9.1: Results

v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 9 Nov 2026, 20:16–21:21 PKT on debug-apk-1.9.1, hosted backend with real push · Ali on Sarim's phone, Ammi on his second Android phone · covers Talha's 1.9 / 1.9.1 change list (ICP-1, ICP-3, 3.16, 6.12, 5.10, 1.8 retest, push check)

24	2	3	2 High
verified / passed	partial	still open	new findings

1. Summary

1.9.1 fixes most of the list: 23 findings verified. The build reaches the server again (F-22), calls start (F-25), and the 5.10 problems are gone (doctor link, Analytics, export, who-added, Take photo, vitals formatting), as well as the directory and accessibility items, the back-swipe question and the KYC dead end (F-20).

Still open: the remote alarm does not ring (F-13, deferred to the next build), Ammi's Panic screen does not change when a Guardian has seen it (F-18), "Give more time" gives Ali no confirmation (F-17), and F-04 is only partly done. **New:** an incoming call can never be answered (**F-29, High**), so ICP-4 calls stay blocked; uploaded files are lost on every server redeploy (**F-26, High, backend / hosting**); plus F-27, F-28 (Medium) and F-30, N-16 (Low).

2. Results

ID	From	Check	Result	Note
F-22	1.9 v0.1	App reaches the server; log in	Verified	Ali and Ammi sign in on both phones
F-25	Push check	Start a call	Verified	The call starts (no 422). It still cannot be answered: F-29
F-08	ICP-1	App icon	Verified	Humsafar icon. The app name in notifications is still "humsafar_talha_frontend" (F-30)
F-04	ICP-1	Names instead of emails	Partial	Zainab Khan / Nasreen on Home, Alerts and the Dependents list; the Missed dose screen still says "ammi4.test@humsafar.dev has not taken..." and "Call ammi4.test@..."
F-19	1.8 retest	Back swipe on the signed-in Home	Verified	"Exit the app?" on Ali and on Ammi
G-03	6.12	Emergency numbers grouped	Verified	Grouped at the top of the Directory
G-04	6.12	Activity-log filters	Verified	Calls / Requests filters present
P-01	5.10	Doctor link with the server address	Verified	https://humsafar-api.../shared/records/... opens the PDF in a browser
P-02	5.10	Analytics with vitals	Verified	No crash; adherence and vitals trends (138/88 mmHg) shown
P-03	5.10	Records PDF export (complete, month)	Verified	Both PDFs made (complete history, November 2026)
P-05	5.10	Who added a record / reading	Verified	"Added by Ali Khan" in the vault
P-06	5.10	Take photo on Add record	Verified	Option present
P-07	5.10	Vitals formatting	Verified	138/88 without .0, 36.9 °C, Fasting shown
N-15	1.8 retest	Delete a medicine	Verified	Delete with a confirm; works
N-07	3.16	Alerts name the Dependent	Verified	Each alert shows Zainab Khan
F-10	ICP-3	Emergency-contact notice title	Verified	"Emergency contact messaged" (8:26 PM, after the unopened Panic of 8:20)
F-12	ICP-3	Standard notices shown	Verified	Notices tab lists Emergency contact messaged, Phone offline and others (with real push)
F-11	ICP-3	Older alerts show a date	Not testable	Alerts can only be opened while an alert is open (F-28)
N-14	3.16	"We told 3 Guardians" wording	Verified	No "(s)"
F-18	ICP-3	Ammi's Panic screen after Ali has seen it	Still open	Still "Waiting for a Guardian to see this" after Ali tapped I've seen it (the new line "This has reached your emergency contact" is correct)
N-03	3.16	"to send help" contrast	Verified	Bright white, readable
N-02	3.16	Large text / high contrast kept after restart	Verified	Still on after closing and reopening
N-05	3.16	Safety buttons at maximum phone font	Partial	PANIC and I am OK fit; I took my medicine is half cut off
N-06	3.16	Urdu HOLD word	Verified	دبائے رکھیں (at normal font)
N-12	3.16	Urdu lines do not touch	Verified	Panic hold screen at normal font
N-10	3.16	Home "Next check" moves on	Not run	No wellness check scheduled on Ammi
F-13	ICP-3	Remote alarm rings	Still open	Only a notification with its sound, even with the app open; no alarm screen. Deferred by Talha to the next build
F-14	ICP-3	Stop label readable	Not testable	No alarm screen appears (F-13)
F-15	ICP-3	Ali's alarm button resets when the alarm ends	Verified	Back to Start alarm by itself
F-17	ICP-3	Give more time confirmed on Ali	Still open	Ammi gets "More time for your medicine ... by 22:12" at once; Ali sees no confirmation
F-20	5.10	Leave a resumed KYC screen	Verified	Reopened on Dependent Verification with ✕ → "cancel the registration?" → Welcome (test account kycretest19.test, phone 0300 1110035)
A-04	3.16	Dose prompt on Home	PASS	At 8:40 PM: "I took my medicine · Step 1 of 2"; missed-dose alert at 9:10 PM on time

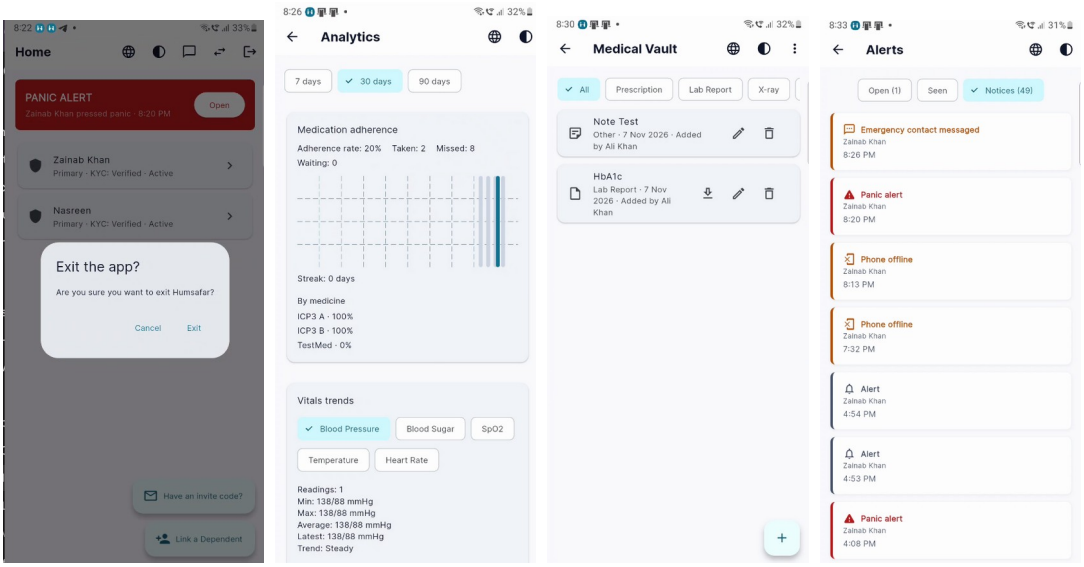

3. New findings

Found on **debug-apk-1.9.1**. F-26 to F-30 continue the ICP / general series; N-16 the 3.16 series. Not retested here: F-21 (no network failure produced), F-23 and F-24 (deferred to the next build), N-13 (Urdu terms decided today in UI text v0.8, not yet in the app), P-08 (deferred scope).

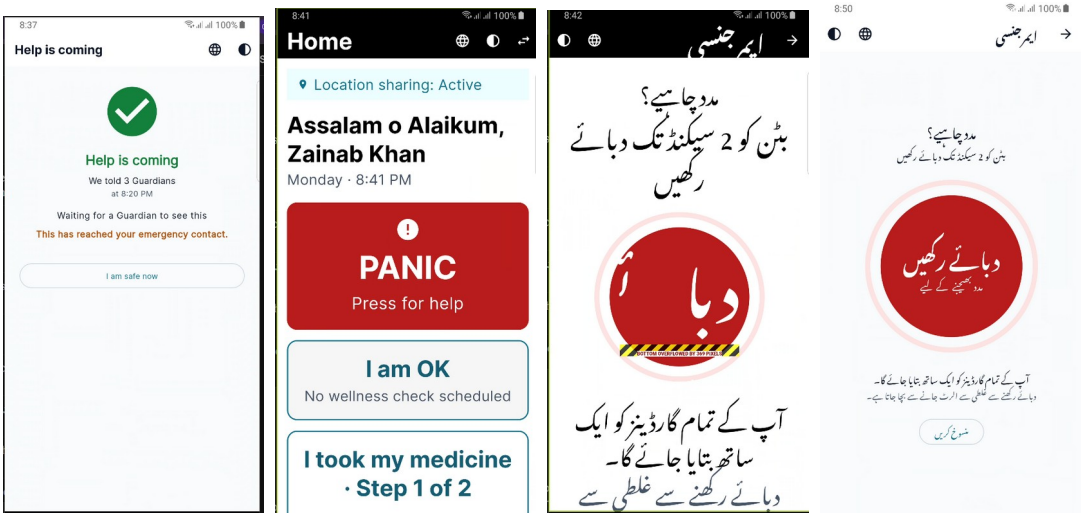

ID	Finding	Sev.	Seen in	Fix / owner	Status
F-29	An incoming call never shows the call screen, even with the callee's app open on Home: only a notification with its normal sound; tapping it opens nothing; after the ring time the call is missed and Ali sees "No answer". ICP-4 calls stay blocked (ZegoCloud free period ends 18 Nov)	High	Calls	Frontend (Talha): show the incoming-call screen from the push (and when the app is open), with ringing	Open
F-26	Uploaded files are lost: the HbA1c PDF (uploaded 7 Nov) is "no longer available" in the records exports, the doctor-link PDF and the vault download. The server keeps files on its own disk (~/humsafar_uploads); on Render's free plan that disk is wiped on every redeploy (there was one today for real push). Affects record files, voice messages, emergency clips and summary reports, and every demo upload	High	P-03, P-01	Backend / hosting (Abdullah): persistent disk or object storage (one class in storage_service.py); re-upload demo files afterwards	Open

ID	Finding	Sev.	Seen in	Fix / owner	Status
F-27	Panic hold screen in Urdu at maximum phone font: the HOLD circle shows only "دبا" and a debug stripe "BOTTOM OVERFLOWED BY 369 PIXELS"	Medium	N-05	Frontend (Talha): let the circle text scale down / wrap; no fixed height	Open
F-28	No way to open Alerts / Notices when no alert is open: Ali's Home shows "Needs attention · See all" only while an alert is open; no bell or Alerts entry on Home or on the Dependent's page. Past alerts cannot be reviewed	Medium	F-11	Frontend (Talha): a permanent Alerts entry (bell) in the Guardian app bar	Open
F-30	The app's name shown by Android (notification header) is "humsafar_talha_frontend"	Low	F-08	Frontend (Talha): android:label = "Humsafar"	Open
N-16	"2 new message(s)" on the Dependent's Messages button	Low	—	Frontend (Talha): plural form, as N-14	Open

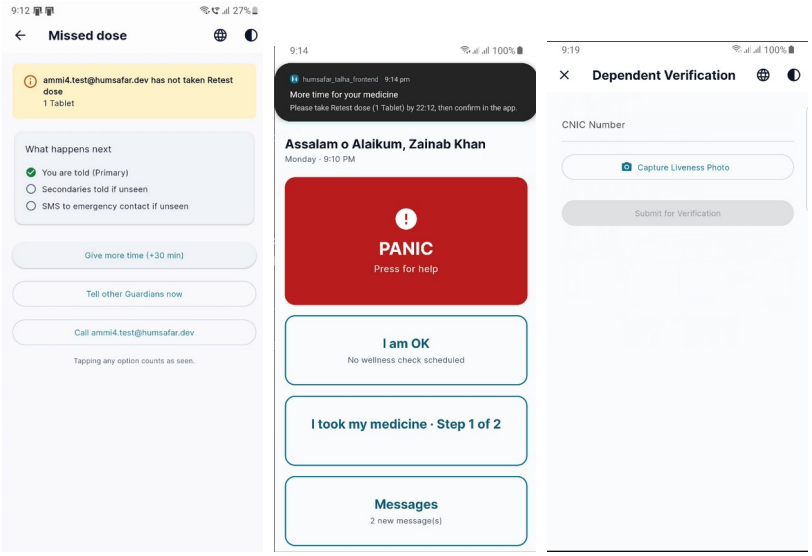

4. Screenshots

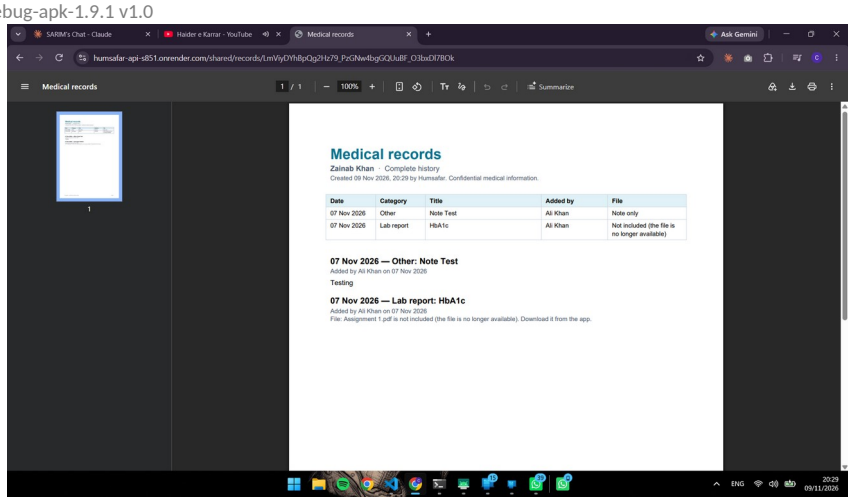

F-19 / F-04 · P-02 · P-05 · N-07, F-10, F-12

F-18 still open · N-05 partial · F-27 · N-06, N-12

F-04 partial · F-17, F-30, N-16 · F-20

P-01 opens; F-26 file "no longer available"

5. What is left

Item	Who	When
F-29 incoming call screen, F-13 alarm ringing, F-23 critical sound, F-24 notification tap, F-17, F-18, F-27, F-28, F-04 rest, F-30, N-16, Urdu terms v0.8	Talha	Next build
F-26 lasting file storage; re-upload demo files	Abdullah	Before the demo
ICP-3 steps 2, 8, 11, A-05 and the ICP-4 calls	Sarim (+ Abdullah for step 8)	After F-29 / F-13
