HUMSAFAR · QA

ICP-5 / 5.10 Records, Vitals & Appointments: Results

v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 7 Nov 2026, 14:00–14:47 PKT on debug-apk-1.8, hosted backend · Ali on Sarim's phone, Ammi on his second Android phone · first pass (phone checks)

12 / 18	2	4	2 High
passed	partial	failed	open findings

1. Summary

Saving works everywhere: records (file or note), vitals from Ali and from Ammi, units, appointments with their checks, cancelled doctor links refused, vitals PDF. **What breaks is reading back and sharing:** the doctor link is shared without the server address (M-01, High), Analytics crashes once there are vitals (M-02, High), and the records PDF export fails in the app (M-03, Medium). The server side of all three works.

12 PASS, 2 partial, 4 FAIL of 18 cases run. Not run in this pass: the band cases, the Secondary-permission cases and the Postman-only checks (section 4).

2. Results

Case	Check	Result	Note
R-01	Add a lab report with a PDF	PASS	"HbA1c", Lab Report, 7 Nov; the Lab Report filter shows it. The list does not show "added by" (M-05)
R-02	Ammi adds a prescription photo with the camera	Partial	A photo from the gallery or files works; there is no camera option (M-06)
R-03	Note-only record; empty record	PASS	Title + note, no file: saved. No file and no note: refused. (A title is always required, as in records_contract.md)
R-08	Export complete history as PDF	FAIL	"Preparing..." then an error (M-03)
R-09	Export an empty month (January 2026)	FAIL	Same error (M-03)
R-11	Doctor link, opened with no login	FAIL	The app shares only "/shared/records/<token>" without the server address, so the link opens a Google search (M-01). With the address added by hand the PDF opens with no login: front page (Zainab Khan · Complete history), table with "Added by Ali Khan", attached PDF after it
R-12	Cancelled link refused	PASS	"SHARE_REVOKED: This link was cancelled"
H-01	Ammi adds blood pressure 138 / 88	PASS	Shows on Ali's Vitals at once; history has no time and no "by Ammi" (M-05)
H-02	Ali adds sugar 112 fasting, SpO2 97, temperature 36.9	PASS	All saved and shown; "Fasting" not shown; values as 112.0 / 138.0/88.0 and "36.9 C" (M-07)
H-03	Units mmol/L and °F	PASS	Unit choice offered when adding
H-08	Delete; no Edit	PASS	Delete on each reading; no Edit
H-09	Chart over 7 / 30 days	FAIL	No chart on Vitals; Analytics crashes with a red error screen (M-02)
H-10	No "high / low / normal" or warning colours	PASS	Numbers only on Vitals
H-11	Vitals PDF export	PASS	Share icon on Vitals gives vitals.pdf
AP-01	Add an appointment; Ammi sees it	Partial	Saved under Upcoming on Ali. Ammi has no "My health" screen, so she cannot see it (M-08)
AP-03	Duplicate and past appointments refused	PASS	"Appointment already exists"; a past time refused
AP-04	Move, cancel, change after cancel	PASS	Move 10:00 → 11:30 shown correctly (S3 retest, same day); after cancel it cannot be changed
AP-05	Delete from History	PASS	Deleted, gone from the list

3. Findings

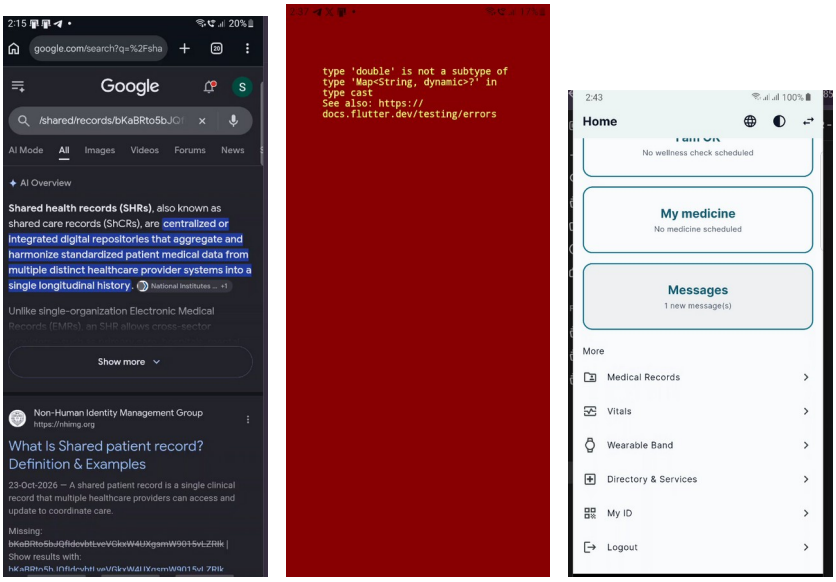

Codes: new series **M-** for 5.10 (records / vitals); F-20 continues the ICP series (found on Ammi's phone during the same session). All found on **debug-apk-1.8**.

ID	Finding	Sev.	Case	Fix / owner	Status
M-01	Doctor link is shared without the server address: the app shares "Here is a secure link to view the medical records: /shared/records/<token>". records_contract.md: "the app must add the server address in front if url starts with /". A doctor cannot open it	High	R-11	Frontend (Talha): prefix the API base URL in doctor_links_screen.dart (line ~73) before sharing / copying	Open
M-02	Analytics crashes as soon as a Dependent has vitals: "type 'double' is not a subtype of type 'Map<String, dynamic>?'". analytics_screen.dart lines 331–334 read min, max, avg, latest as maps, but analytics_contract.md sends min, max, avg as numbers (only latest is an object)	High	H-09	Frontend (Talha): read min / max / avg as numbers (plus *_diastolic for blood pressure)	Open
M-03	Medical records PDF export fails ("preparing", then an error) for complete history and for a month. The server's PDF builder works (the doctor link gives the same PDF) and the vitals export works, so the cause is most likely in the app's records export path	Medium	R-08, R-09	Frontend (Talha), confirm with the exact error; Abdullah only if GET .../records/export itself fails	Open
F-20	After an interrupted Dependent sign-up the app always reopens on the KYC / liveness screen with no Back, Cancel or Logout, so the phone cannot sign in to any other account (only "Clear data" in Android settings frees it)	Medium	1.8 KYC resume	Frontend (Talha): add Cancel / Log out on the resumed KYC screen that clears the pending registration	Open
M-05	Records list and vitals history never show who added an item or the time; the server sends uploaded_by_name and the reading time, the app does not read them	Low	R-01, H-01	Frontend (Talha)	Open
M-06	Add record has no camera option (gallery / files only); the main use is a Dependent photographing a prescription	Low	R-02	Frontend (Talha): add "Take photo"	Open
M-07	Vitals formatting: whole numbers shown with ".0" (138.0/88.0, 112.0), temperature "36.9 C" without °, blood-sugar context (Fasting) not shown	Low	H-02	Frontend (Talha)	Open
M-08	The Dependent cannot see her appointments or her vitals: "My health" (design screen 28) is not built (already on the handoff's designed-but-not-built list)	Low	AP-01	Team scope decision; Frontend (Talha) if kept	Open

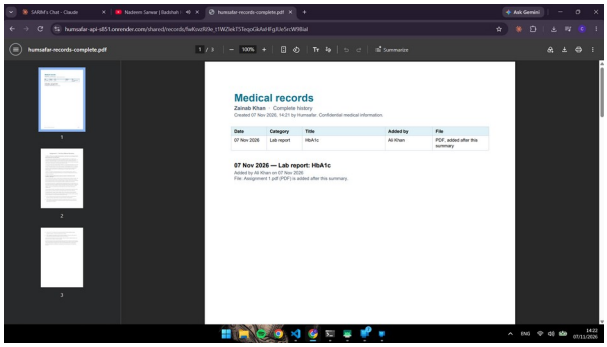

4. Not run in this pass

Cases	Why / when
Band W-01 – W-10	Wait for the real band (Task 5.5); run with S8
Secondary permissions R-04, R-06, R-13, R-16, RA-01 – RA-09, H-07	Need Sara with health_records ON (now OFF) and /docs steps: second pass
R-05, R-07, H-04 – H-06	Postman checks (bad files, impossible values, retries): covered by the 7.7 backend regression, repeat in S9
R-10 (Urdu in PDF), R-14 / H-12 (audit), R-15 (encryption on disk), AP-02 (reminders)	Second pass / S9; AP-02 also needs real push (ICP-3 F-16)

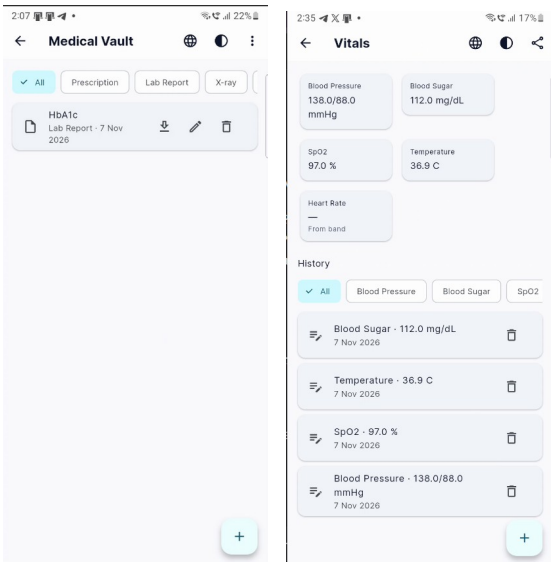

5. Screenshots

M-01 link opens a search · M-02 Analytics crash · M-08 Ammi: no My health

R-11 PDF opens once the address is added

R-01 Medical Vault · H-01 / H-02 Vitals
