Secondary Guardian Permission Checks: Results

v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 9 Nov 2026, 16:40–17:10 PKT on the hosted backend through /docs (no app) · Ali (Primary), Sara and Bilal (Secondary) on Ammi · second pass of 5.10, 6.12 and 4.10

1. Summary

Every permission rule held. A Secondary sees and does only what the Primary allowed, a change takes effect on her next request, hidden record categories disappear everywhere (list, record, new links, existing links), switching health records off cancels her doctor links, and every hide or show is in the audit log. Bilal, with everything off, is refused everywhere. **No new finding.** These cases were "not run" in the 5.10 v1.0, 6.12 v1.0 and 4.10 v1.0 reports (Sara had no health_records then).

Run through the server's /docs page because the app build is blocked (F-22). The server now also returns the doctor link with its full address (5.10 P-01, server side).

3. Test set-up afterwards

- Sara: health_records **OFF** (as before the run), communication ON, emergency_alerts ON, medication_management ON; Lab reports visible again.
- Bilal: everything OFF (unchanged). New data from the run: Sara's SpO2 97; visit requests to Dr. Kamran (Ali, confirmed) and Nurse Ayesha (Sara, confirmed); Sara's message to Ammi; two doctor links (both now cancelled).

4. Still not run

- RA-05 (Sara's own upload in a hidden category), RA-06 (Bilal with health_records ON), RA-07 (greyed switches in the app, screen 15e), R-16 by Prescriptions, H-08 (Sara deletes Ali's reading): next pass, mostly on the rebuilt APK.
