HUMSAFAR · QA

3.16 Accessibility Audit: Results

Task 3.16 · v1.0 · prepared by Syed Sarim Jawad Zaidi (QA) · run 30 Oct 2026 on debug-apk-1.7 against the hosted backend

20 / 27	4	1	2
cases passed	partial	failed	blocked (medicine bug)

1. Summary

The 3.16 audit checks the Dependent Mode safety screens (20 Home, 21 Panic, 21b Help is coming, 22 Wellness check) and the Guardian home / Alerts on a real Android phone: 2 taps to every safety action (NFR-07), large text and contrast (NFR-08, FR-P2), touch targets (FR-P1), Urdu (FR-P4, NFR-09) and TalkBack. **20 of 27 cases passed, 4 partial, 1 failed, 2 blocked.**

Good news: Panic and the wellness check are reachable in 2 taps; a short press never sends Panic; the safety buttons pass size and contrast in both modes; Urdu is complete and right-to-left.

Must fix before ICP-3 / ICP-7: a Guardian cannot add a medicine in the app (N-01, High; it also blocks ICP-3 steps 9–10). Then the Medium items: large text not remembered, "to send help" contrast, TalkBack on HOLD, the maximum-font layout, the Urdu HOLD word, and alerts without the Dependent's name. These feed Talha's 7.5 accessibility pass.

2. Set-up

Item	Detail
Build	Talha's debug-apk-1.7 on Sarim's Android phone (mirrored with scrcpy).
Backend	Hosted (Render), normal timers.
Accounts	Dependent: Nasreen (nani2.test) so Ammi stays clean for ICP-3. Guardian: Ali (Primary). Wellness check set by Ali at 15:45.
Tools	Google Accessibility Scanner (contrast, touch targets, labels); Android TalkBack; contrast also calculated from the app code (panic_hold_button.dart).
Test cases	docs/qa/Humsafar_QA_3.16_Accessibility_Test_Cases_v0.1.pdf (27 cases, groups A–F).

3. Results by case

#	Check	Result	Note
A-01	Send Panic in 2 taps (PANIC → hold HOLD 2 s)	PASS	"Help is coming · We told 1 Guardian(s)"; Ali got the alert
A-02	Short press on HOLD sends nothing; Cancel returns Home	PASS	Ring fills and resets on release; nothing sent
A-03	Answer a wellness check in 2 taps from Home	PASS	I am OK → Yes, I am OK → "Thanks — marked as OK" (check at 15:45)
A-04	Confirm a dose in 2 taps from Home	BLOCKED	No medicine could be added (N-01). Retest on 1.8
A-05	Dose from the notification still needs 2 steps	BLOCKED	Same as A-04
A-06	"I need help" opens Panic, sends nothing	PASS	Opened the HOLD screen
A-07	Safety buttons visible without menus or scrolling	PASS	PANIC, I am OK, My medicine all on the first screen (normal font)
B-01	Large text ON: bigger, nothing cut off (20, 21, 22)	PASS	Nothing cut off. 3 small lines do not grow (N-09)
B-02	Large text remembered after the app is closed	FAIL	Resets to standard on every start (N-02)
B-03	No contrast warnings (Accessibility Scanner, 20/21/22, both modes)	PASS	Scanner: only icon-label suggestions; no Text contrast
B-04	"Press for help" under PANIC at least 4.5 : 1	PASS	Now white on #B91C1C (6.5 : 1). But "to send help" under HOLD is 3.8 : 1 (N-03)
B-05	Phone font at maximum + large text: still usable	Partial	Nothing cut off, but PANIC only partly on the first screen; I am OK / My medicine need scrolling (N-05)
B-06	Status never by colour alone	PASS	Next check time, Step 1 of 2, Taken all in words
B-07	Colours match style guide v0.2	PASS	Teal actions, red only on Panic / I need help; amber banner
C-01	Touch targets at least 48 dp (scanner)	PASS	Safety buttons pass. Small non-safety target: "Open Settings" (N-11)
C-02	PANIC full width and tall; HOLD large	PASS	PANIC ≈ a quarter of the screen; HOLD a large circle
C-03	10 quick thumb taps: no mis-tap onto PANIC	PASS	No mis-taps
C-04	All safety buttons reachable one-handed	PASS	
D-01	Urdu: no English left on 20 / 21 / 22	PASS	Only the name and "PM"
D-02	Urdu: right-to-left, back arrow mirrored	PASS	
D-03	Urdu + large text: nothing cut off	Partial	Not cut off, but Nastaliq lines touch in the HOLD circle and under "I need help" (N-12). Button labels in Naskh in large-text mode = ICP-1 F-03 (fix in 1.8)
D-04	Urdu wording matches the UI text sheet v0.6	Partial	3 differences; HOLD says "press" instead of "keep pressing" (N-06, N-13)
E-01	TalkBack reads Home in a sensible order	PASS	Panic, I am OK, My medicine read correctly. Top-bar icons unnamed (N-08)
E-02	Panic usable with TalkBack; hold announced	Partial	HOLD read only as "0 percent"; no hold instruction (N-04). Not sent on purpose
F-01	Aa and EN|UR in every app bar	PASS	Nani 20/21/22, Ali Guardian home + Alerts, Login, Create account
F-02	Guardian home + Alerts with a Panic open: no contrast warnings	PASS	Home 5 / Alerts 4 suggestions, icon labels only. Alerts do not name the Dependent (N-07)
F-03	The 2.9 BLOCKED checks (Login, Create account)	PASS	Scanned; icon-label suggestions only; Aa and EN|UR present

4. Findings

Severity: **High** blocks a core flow; **Medium** hurts accessibility of a safety action or a requirement; **Low** cosmetic or minor. All app-side, for Talha unless noted.

ID	Finding	Sev.	Case	Fix / owner	Status
N-01	Adding a medicine always fails ("Couldn't save"): the app sends time, POST /medications needs times (a list). Edits work	High	A-04	Talha: send times: [hh:mm] on create (medication_schedule_screen.dart). Blocks ICP-3 steps 9–10	Open
N-02	Large-text / high-contrast setting is not saved; resets on every app start	Medium	B-02	Talha: save the mode (e.g. shared_preferences) in AccessibilityModeNotifier	Open
N-03	"to send help" under HOLD is white 70 % on red = 3.8 : 1 (min 4.5). Measured from the code; the scanner did not flag it	Medium	B-04	Talha: Colors.white (6.5 : 1), same fix as "Press for help"	Open
N-04	TalkBack reads HOLD only as "0 percent"; no instruction to hold 2 s	Medium	E-02	Talha: Semantics label "Panic. Double-tap and hold for 2 seconds to send help"; exclude the progress ring	Open
N-05	Phone font at maximum: PANIC only partly on the first screen; I am OK / My medicine need scrolling	Medium	B-05	Talha: compact location banner or cap text scale on the Dependent home	Open
N-06	Urdu HOLD label is "دبائیں" (press) instead of "دبائے رکھیں" (keep pressing); may lead to a tap that sends nothing	Medium	D-04	Talha: use the UI text sheet wording	Open
N-07	Guardian Alerts list does not say whose alert it is (Ali has 2 Dependents)	Medium	F-02	Talha: show the Dependent's name (or email until F-04) on each alert	Open
N-08	Top-bar icon buttons have no screen-reader names (all screens)	Low	E-01	Talha: tooltip / semanticLabel on each IconButton	Open
N-09	Three lines do not grow with large text: helper lines under "I need help", "All your Guardians will be told at once"	Low	B-01	Talha: use theme text styles instead of fixed sizes	Open
N-10	Home "Next check" never shows "due now" and does not move on after answering	Low	A-03	Talha: refresh on resume / after answering	Open
N-11	"Open Settings" link in the location banner ≈ 24 dp tall	Low	C-01	Talha: min 48 dp tap area	Open
N-12	Urdu Nastaliq lines touch each other (HOLD circle, wellness helper lines)	Low	D-03	Talha: more line height for Urdu	Open
N-13	Urdu word choices differ from the sheet: PANIC ایمرجنسی vs مدد; Wellness check ویلنیس چیک vs خیریت کی جانچ	Low	D-04	Team: decide in the Urdu review (7.4)	Open
N-14	"We told 1 Guardian(s)" wording	Low	A-01	Talha: plural form (1 Guardian / 2 Guardians)	Open

4.1 Seen again, already tracked (ICP-1)

- **ICP-1 F-03:** Urdu button labels in Naskh in large-text mode (Cancel on Panic). Confirmed only in that mode; normal mode uses Nastaliq. Fix in 1.8.
- **ICP-1 F-04:** the Guardian panic banner shows the Dependent's email, not the name.
- **ICP-1 F-05:** the Guardian home title still reads "Guardian App" on 1.7 ("Home" in 1.8).

4.2 Notes

- The Accessibility Scanner did not flag "to send help" (text with transparency on a coloured background); the 3.8 : 1 value is calculated from the colours in the code.
- A "Phone offline" alert for Nani was expected: location was switched off on the test phone.
- The test Panic (15:35) was acknowledged by Ali and closed by Nani ("I am safe now") after the audit.

5. What is left

Item	Who	When
Fix N-01 (add medicine) and retest A-04, A-05	Talha, then Sarim	1.8
Fix N-02 – N-07 (Medium) for the 7.5 accessibility pass	Talha	7.5
Retest B-02, B-04 ("to send help"), B-05, D-04, E-02, F-02 alerts	Sarim	After the fixes
Urdu word choices (N-13) in the native-speaker review	Team	7.4

When the medicine bug is fixed and A-04 / A-05 pass, this report goes to v1.1.
