Humsafar — QA Results: Backend regression, Phases 1–7

Task 7.7 (QA regression pass) · v2.0 · Based on the 1.13 QA Checklist Template · follows v1.0 (21 Oct, Phases 1–6.1) · Tester: Syed Sarim Jawad Zaidi

Verdict: the whole backend (Phases 1–7: every task from 1.3 to 7.2) passes the full Postman collection on the tester's laptop: **1501 of 1501 checks passed, 0 failed, 0 errors, 0 product bugs.** App-side checks still wait for a debug APK and, for camera and analytics, Talha's field-name fix (6.13 F-01).

1. Test run details

Field	Value
Scope	Task 7.7 regression of the whole backend: Phases 1–5 (band with mock data), Phase 6 (6.1–6.7) and Phase 7 (7.1, 7.2)
Build tested	dev branch, commit 7467459 (after PR #79). Database migrated to 0022
Environment	Backend run locally on the tester's laptop: http://127.0.0.1:8000, PostgreSQL, scheduler on (default), WEARABLE_MOCK_ENABLED on (default)
Tool	Postman Collection Runner · "Humsafar API - Phase 1-6" (backend/postman/Humsafar_API_Phase1.postman_collection.json) · environment Humsafar-Local · 1 iteration, no delay
Device(s)	None. Backend-only run; the Flutter app was not part of this pass
Tester	Syed Sarim Jawad Zaidi
Date	22/10/2026 (run started 06:25:07 PM, duration 7 min 54 s, average response 115 ms)
Related documents	SRS v1.0 · docs/api/ contracts · 2.9 Phase 1 results · v1.0 of this report · 6.13 security review v0.1 · test cases 3.17, 4.10, 5.10 v0.4, 6.12 v0.4

2. Collection run summary

Each request has automatic checks (assertions). Red 4xx lines in the backend log (401, 404, 422) are deliberate "should be refused" tests; they count as passed when the backend refuses correctly. Request and check counts per folder are taken from the collection file; the runner reported all 1501 passed.

Folder	Phase	Requests	Checks	Passed	Failed
1 - Auth (Task 1.3)	Phase 1	9	21	21	0
2 - KYC (Task 1.4)	Phase 1	13	25	25	0
3 - Linkage (Task 1.5)	Phase 1	23	36	36	0
4 - Permissions (Task 1.6)	Phase 1	23	37	37	0
5 - Location (Task 2.1)	Phase 2	28	44	44	0
6 - Geofences (Task 2.2)	Phase 2	32	49	49	0
7 - Device health (Task 2.3)	Phase 2	27	40	40	0

Folder	Phase	Requests	Checks	Passed	Failed
8 - Notifications (Task 3.1)	Phase 3	29	45	45	0
9 - Medication (Task 3.2)	Phase 3	37	58	58	0
10 - Missed dose (Task 3.3)	Phase 3	31	45	45	0
11 - Wellness check (Task 3.4)	Phase 3	35	53	53	0
12 - Escalation chain (Task 3.5)	Phase 3	21	29	29	0
13 - Panic Mode (Task 3.6)	Phase 3	30	48	48	0
14 - Remote alarm (Task 3.7)	Phase 3	31	48	48	0
15 - Emergency contact (Task 3.8)	Phase 3	30	44	44	0
16 - Messaging (Task 4.2)	Phase 4	32	46	46	0
17 - Voice messages (Task 4.3)	Phase 4	28	43	43	0
18 - Calls (Task 4.4)	Phase 4	37	59	59	0
19 - Medical vault & appointments (5.1, 5.2)	Phase 5	69	124	124	0
20 - Manual vitals (Task 5.3)	Phase 5	47	75	75	0
21 - Wearable band, mock data (Task 5.4)	Phase 5	39	61	61	0
22 - Healthcare directory, providers (Task 6.1)	Phase 6	39	64	64	0
23 - Home-care requests, Activity Timeline (6.2)	Phase 6	43	71	71	0
24 - Camera pairing, viewing, permission (6.3)	Phase 6	40	64	64	0
25 - Emergency clip capture (6.4)	Phase 6	36	55	55	0
26 - Security headers, brute-force limit (6.5)	Phase 6	11	23	23	0
27 - Audit log (6.6)	Phase 6	27	37	37	0
28 - Account closure, data retention (6.7)	Phase 6	36	60	60	0
29 - Analytics (7.1)	Phase 7	31	45	45	0
30 - Summary reports (7.2)	Phase 7	35	52	52	0
Total		**949**	**1501**	**1501**	**0**

Compared with v1.0 (21 Oct: 690 requests, 1094 checks): 259 more requests and 407 more checks for Tasks 6.2–7.2 (folders 23–30), all passed. The timer folders waited for the server job and passed. The backend was freshly started so the wrong-password counters began at zero (folder 26).

3. Section A — Functional areas

ID	Req.	What to check (steps)	Expected result	Result	Notes / Bug ID
F-01	FR-A1–A4, FR-B1, B2	Folders 1–4: register, login, tokens, Guardian verification, Dependent KYC, linking, invites and the 1 + 2 cap, permission dashboard	Same results as the 2.9 Phase 1 pass (regression)	PASS	119 checks
F-02	FR-C1, C2, C3, L1, L2	Folders 5–7: send and read location with the adaptive interval, safe zones with breach and recovery, battery alert and device health	Locations stored; one breach alert per exit, closed on return; low-battery alert; wrong input refused	PASS	133 checks
F-03	FR-M1, M2, F1, D1	Folders 8–10: alerts and acknowledgment, push token, medicine schedules, reminders, two-step dose confirmation, missed dose extend / escalate	Alerts reach the right Guardians; dose needs both steps; missed dose alerts and can be extended or escalated	PASS	148 checks; waits for the server timer
F-04	FR-D4, D5, R1	Folders 11, 12, 15: wellness check schedule, prompt and answer; escalation Primary → Secondary → external contact; emergency contact set / replace / remove	Unanswered check escalates; chain climbs and stops when acknowledged; mock SMS sent once	PASS	126 checks; waits for the server timer
F-05	FR-D2, D3	Folders 13–14: Panic press, read, close; remote alarm sound, read, stop	Every Guardian told at once; double press = one panic; alarm Primary-only	PASS	96 checks
F-06	FR-E1, E2, E4	Folders 16–18: text messages with read receipts and safe retry, urgent voice messages, voice / video call lifecycle	Delivered once; receipts; voice file checked; calls accept / decline / missed / end	PASS	148 checks
F-07	FR-G1–G4	Folder 19: records upload, list, file, export PDF, doctor link, appointments, category access for a Secondary	Right people see the right records; hidden category looks "not found"; PDF and link work	PASS	124 checks
F-08	FR-H1	Folder 20: blood pressure, sugar, SpO2, temperature; units converted; latest; vitals PDF; access by a Secondary	Saved with who and when; impossible values refused; no high / low in replies	PASS	75 checks
F-09	FR-H2	Folder 21: pair, sync batches (mock data), status, unpair, access by a Secondary	Retried batch stored once; bad readings skipped and reported; status correct	PASS	61 checks; real band waits for Task 5.5
F-10	FR-I1, J1	Folder 22: organizations (search, type, city, open 24 h, nearby, paging), providers (specialization, charge range, sort)	Correct filters and order; national numbers kept last; bad filters 422; unknown id 404	PASS	64 checks
F-11	FR-J1, FR-I2/J2	Folder 23: requests (one open per provider, safe retry, status flow, who may change), contact log, Activity Timeline, booking_update notice	Matches booking_contract.md; finished requests cannot change (409)	PASS	71 checks
F-12	FR-K1, FR-K1.3	Folder 24: pair / status / unpair, heartbeat, start / renew / stop watching, who is watching, permission gate	Only Primary and Secondaries with camera_viewing watch; the Dependent sees who is watching	PASS	64 checks; real video needs the camera phone (6.10)
F-13	FR-K2, FR-N2	Folder 25: clip request on Panic / alarm, upload, list, download (audited), delete, missed after 3 minutes	Clip stored encrypted; wrong phone refused; expired request refused	PASS	55 checks

ID	Req.	What to check (steps)	Expected result	Result	Notes / Bug ID
F-14	FR-N3, FR-O1	Folders 27–28: audit log (Primary only, read-only), account closure, reopen, ACCOUNT_CLOSED, retention	Secondary 403, other methods 405; closed account refused everywhere; reopen works	PASS	97 checks
F-15	FR-Q1, FR-Q2	Folders 29–30: adherence and vitals analytics, report schedule, make now, list, download, delete, permissions per part	Numbers match the stored doses and readings; report parts follow permissions	PASS	97 checks

4. Section B — Security spot-checks

ID	Req.	What to check (steps)	Expected result	Result	Notes / Bug ID
S-01	SDS 11.3	Protected endpoints without a token (the "no token" case in each folder; last request of the run: directory without token)	401, no data	PASS	Seen in the backend log
S-02	SDS 11.3	Expired access token (older than 15 min)	TOKEN_EXPIRED; app refreshes once and retries	BLOCKED	Needs the app (same as 2.9)
S-03	FR-A4	A Secondary without the module tries location, records, vitals, band, messaging, calls	403 / refused	PASS	"Access by a Secondary" and "Rejected requests" sub-folders
S-04	FR-G2	A hidden record category for a Secondary	Left out of lists and exports; direct access looks "not found"	PASS	Folder 19, Task 5.2 part
S-05	FR-D2	Panic with a Secondary who has no alert permission	Still reaches every linked Guardian	PASS	Folder 13
S-06	Input	Wrong formats and impossible values (vitals ranges, band readings, directory filters, file types)	422 with a clear error; nothing saved	PASS	Red 422 lines in the log are these planned cases
S-07	FR-K1.3	Camera viewing indicator on the Dependent's phone	Shows every time	N/A	Backend side PASS (folder 24, GET …/camera/viewing); the app side needs a device and Talha's 6.9 field-name fix (6.13 F-01)
S-08	SDS 17	Wrong-password limit (8 per email in 5 minutes), other emails not affected; hardening headers	9th try 429 with Retry-After; another email still 401; headers present	PASS	Folder 26 (6.13 S-21, S-23)
S-09	FR-N3	Audit log: Secondary and Dependent refused; no edit or delete	403 NOT_PRIMARY_GUARDIAN / FORBIDDEN; 405 on other methods	PASS	Folder 27 (6.13 S-06)
S-10	FR-O1	Closed account refused on sign-in, refresh and old tokens	403 ACCOUNT_CLOSED	PASS	Folder 28 (6.13 S-07)

5. Link to the written test cases

- 5.10 v0.4: the API side of the records (R-), record category (RA-), appointment (AP-), vitals (H-) and band (W-) cases is exercised by folders 19–21. The screen steps of those cases still wait for Talha's 5.6–5.8; W-09 and W-10 wait for the real band (5.5).
- 6.12 v0.4: the API side of the directory (D-01–D-08), requests and timeline (D-09–D-18), camera (K-01–K-11) and clips (K-12–K-17) is exercised by folders 22–25. The app steps wait for a debug APK; the camera parts also for the 6.9 field-name fix and the camera phone (6.10).
- 6.13 v0.1: this run closes S-06 (audit log access), S-07 (closed account), S-21 (wrong-password limit), the permission half of S-16 and confirms S-23 (headers) at runtime. Still open: S-09 (phone-code limit) and S-12 (no-store on the stream token) are not in the collection; checked by hand later.
- 3.17 and 4.10: the backend part of the escalation, messaging and call cases is covered by folders 10–12, 15–18; the ICP-3 and ICP-4 live runs still need the app.

6. Bug log and observations

No product bugs found. Two observations about the test setup:

ID	Type	What happened	Cause	Action
OBS-01	Test setup	Old collection and both old environments deleted before importing the new files	Avoids running yesterday's 22-folder copy	Keep doing this before every run
OBS-02	Tool limit	"Export Results" needs a paid Postman plan	Free plan limit	The run summary screenshot (1501 / 1501, 0 errors) and the backend log are kept as evidence instead

7. Summary and sign-off

Section	Checks	Pass	Fail	Blocked	N/A
A — Functional areas	15	15	0	0	0
B — Security	10	8	0	1	1
Total	**25**	**23**	**0**	**1**	**1**

Decision	Details
Open Critical / High bugs	None
Verdict	*[x] Backend built so far passes regression [ ] Pass after listed fixes [ ] Not ready. App-side checks wait for the screens*
Follow-ups	Run again after each later backend task and before ICP-8 · S-02 and FR-K1.3 on a device · S-09 and S-12 by hand
Tester	Syed Sarim Jawad Zaidi · 22/10/2026
