HUMSAFAR

Logo & Slogan Brief

For the team's logo designer and for Gemini · v1.0 · prepared by Syed Sarim Jawad Zaidi (design owner)

1. The project in one paragraph

Humsafar is a mobile app that lets a family look after a vulnerable loved one (an elderly parent, a chronically ill or disabled person, or someone with dementia) even when they cannot be there in person. The person being cared for (the **Dependent**) uses a very simple mode with big buttons; family members (the **Guardians**) get alerts, see where the Dependent is, check medicines and health records, and can talk or video-call. If something goes wrong and nobody responds, the alert climbs from one Guardian to the next and finally to an emergency contact by SMS.

1.1 What the name means

ہم سفر

Humsafar (Urdu) means **"companion on a journey"** or **"fellow traveller"**: someone who walks the road of life beside you. The logo should carry that idea: **two people moving together, one looking after the other, never alone.**

2. Who it is for

Person	Who they are	What they feel
Dependent	Elderly parent, chronically ill or disabled person, dementia patient; often not comfortable with technology	Wants to feel safe and independent, not watched or treated as a patient
Primary Guardian	Usually a son or daughter; sets up the app and permissions	Worried when away; wants peace of mind and quick action in an emergency
Secondary Guardians	Up to two more family members or carers	Wants to help and be told when needed

Market: Pakistan first. The app is in **English and Urdu**, built for Android.

3. What the app can do

Area	Capability
Safety	One-press Panic button; Wellness Check ("Are you OK?") at set times; Remote Alarm that rings the Dependent's phone; escalation Guardian → Guardian → SMS
Medicine	Medicine schedules, reminders, two-step "I took it" confirmation, missed-dose alerts
Location	Live map, location history, safe zones with alerts when the Dependent leaves
Health	Medical records vault, PDF export, time-limited doctor link, appointments, daily vitals, a wearable band (heart rate)
Communication	Messages, urgent voice messages, voice and video calls
Care services	Directory of ambulances, hospitals and labs; home-care nurse requests
Camera	Family can look in through a spare phone camera, with a clear "being watched" notice; short clip saved on Panic
Insight	Medicine and vitals charts, weekly / monthly reports
Access and trust	Big-text mode, English / Urdu, permissions per family member, encryption, audit log

4. What the logo must say at first glance

- **Care and connection between two people** (a loved one and family) — the core.
- **Journey / being together** — from the name Humsafar.
- **Safety and protection**, in a calm and warm way (not alarm, not hospital).
- Optional hint of **location / always reachable** (a map pin shape), because location and alerts are central.

4.1 Personality

The brand is	The brand is not
Caring, warm, family	Clinical, hospital, medical-device
Calm, reassuring, trustworthy	Alarming, emergency-red, panic
Simple, friendly, easy for elders	Techy, complex, futuristic
Protective and respectful	Surveillance, CCTV, "big brother"
Local and bilingual (Pakistan)	Generic Western health app

5. Concept directions (for Gemini and the designer)

#	Concept	Idea
A	Two companions	Two simple rounded figures side by side, the taller one's arm around or curving over the smaller one, forming a protective arc. Reads as family and care.
B	Paths that join	Two flowing lines (two lives) that meet and continue as one road, together shaping a heart or the letter H. Reads as journey and togetherness.
C	Pin + heart	A location pin whose inner shape is a heart, or two figures inside the pin. Reads as "always know they are safe".
D	Sheltering hand	A gentle open hand or arc sheltering a small figure or heart. Reads as protection and care. Keep it soft, not religious, not medical.
E	Monogram H	A rounded H where the two upright strokes are two people joined by the crossbar like held hands. Strong as a small app icon.
F	Bilingual wordmark	Clean "Humsafar" in a rounded sans plus "ہم سفر" in Nastaliq, paired with the chosen symbol (A–E).

Recommended to explore first: **B** and **E** (simple, unique, work at 48 px), then **A** and **C**.

6. Colours and type

Role	Colour	Note
Main	#0E7490 teal-blue	The app's primary colour; calm and trustworthy. Must be the logo's main colour.
Dark	#155E75	For text and the dark logo version
Light	#ECFEFF / #CFFAFE	Backgrounds, soft fills
Warm accent (optional)	#F59E0B amber	A small warm touch (heart, sun, joining point). Use sparingly.
Do not use	Red	Red is reserved in the app for Panic and critical alerts

Type: wordmark in a rounded or humanist sans (Inter, Nunito, Poppins or similar), medium–bold weight, sentence case "Humsafar". Urdu "ہم سفر" in a Nastaliq style (e.g. Noto Nastaliq Urdu or Jameel Noori Nastaleeq).

7. Technical requirements

- Final logo as **vector** (SVG and AI / Figma source). Gemini images are only concepts; the designer redraws the chosen one in vector.
- Must stay clear at **48 px** (app icon) and **16 px** (favicon): few shapes, thick strokes, no thin lines or small text.
- Versions: full colour, one-colour teal, white on teal, black; icon only, horizontal lockup (icon + Humsafar), stacked lockup, bilingual lockup (Humsafar + ہم سفر).
- Android app icon: square 1024 × 1024 artwork, symbol inside the central 66 % safe zone (adaptive icon), plain teal or white background.
- Works on white, on #F8FAFC and on teal; passes contrast for the wordmark.

7.1 Avoid

- Red cross or red crescent (protected emblems, and red = Panic in the app).
- Stethoscope, pill, syringe, hospital building, ECG line alone (generic and clinical).
- Eyes, cameras or anything that feels like surveillance.
- Text inside the icon, gradients that disappear in one colour, more than three colours.
- Copying or closely resembling any existing app or brand logo.

8. Slogan

Option	Why it fits
Care that travels with you.	Picks up the "journey" meaning of Humsafar; warm and short. (Recommended)
Close to them, even from afar.	Says exactly what the app does for a Guardian
Never alone on the journey.	Speaks to the Dependent; strong emotional line
Together, every step.	Very short; works under the logo
Family care, wherever you are.	Plain and clear for first-time users

Urdu options (to be checked by a native speaker before use):

ہر قدم، ساتھ ساتھ

"Every step, together" (recommended Urdu line)

دور رہ کر بھی قریب

"Close, even when far away"

اپنوں کا ساتھ، ہر لمحہ

"Your loved ones beside you, every moment"

9. Prompts for Gemini

How to use: paste the **master prompt** first in a new Gemini chat, then send **one concept prompt at a time**. Ask for 4 variations each. Pick 2–3 favourites, then use the refine prompts. AI images often misspell words, so judge the **symbol**, and let the designer add the wordmark.

Master prompt (send first)

```
You are a senior brand identity designer. I need logo concepts for a mobile app called "Humsafar". Humsafar is an Urdu word meaning "companion on a journey" or "fellow traveller". The app helps families in Pakistan look after a vulnerable loved one (an elderly parent, a chronically ill or disabled person, or someone with dementia) even when they are far away: a simple Panic button, "Are you OK?" check-ins, medicine reminders, live location with safe zones, medical records, messages and video calls, and alerts that pass from one family member to the next until someone responds. The brand must feel caring, calm, warm, trustworthy and family-centred; it must NOT feel clinical, like a hospital, alarming, or like surveillance. Main colour: teal-blue #0E7490, dark #155E75, light #ECFEFF; an optional small warm accent in amber #F59E0B. Never use red, and never use a red cross, stethoscope, pill, ECG line, eye or camera. Style: flat vector, simple geometric shapes with soft rounded corners, thick consistent strokes, no gradients, no 3D, no text inside the symbol, plain white background, centred, lots of empty space around it. It must still be recognisable as a 48-pixel app icon. Do not imitate any existing brand. Reply "Ready" and wait for my concept requests.
```

Concept A · Two companions

```
Create 4 variations of a logo symbol for Humsafar: two simple rounded human figures side by side, a taller one gently curving an arm or arc over a smaller one, together forming a protective shape. Teal-blue #0E7490 with an optional amber #F59E0B heart or dot. Flat vector, white background, no text.
```

Concept B · Paths that join

```
Create 4 variations of a logo symbol for Humsafar: two smooth flowing lines, like two roads or two lives, that come from different sides, meet, and continue together as one path. Where they meet they suggest a heart or the letter H. Teal-blue #0E7490 lines, small amber #F59E0B accent where the paths join. Flat vector, white background, no text.
```

Concept C · Pin and heart

```
Create 4 variations of a logo symbol for Humsafar: a rounded map location pin whose inner space forms a heart, or holds two small simple figures close together. It should say "you always know your loved one is safe" in a warm, not technical, way. Teal-blue #0E7490 pin, amber #F59E0B heart. Flat vector, white background, no text.
```

Concept D · Sheltering arc

```
Create 4 variations of a logo symbol for Humsafar: a soft open hand or a gentle curved arc sheltering a small figure or a small heart beneath it, showing protection and care. Keep it calm and friendly, not medical and not religious. Teal-blue #0E7490 with an amber #F59E0B centre. Flat vector, white background, no text.
```

Concept E · H monogram

```
Create 4 variations of a monogram symbol for Humsafar based on a rounded letter H: the two vertical strokes are two simple people (small round heads on top) and the crossbar is their joined hands. One figure slightly taller than the other. Bold, simple, works as a tiny app icon. Teal-blue #0E7490, optional amber #F59E0B on the joined hands. Flat vector, white background.
```

Concept F · Full lockup

```
Take my favourite symbol from above and show it in 3 layouts on a white background: (1) symbol left of the word "Humsafar" in a rounded bold sans-serif, dark teal #155E75; (2) symbol above the word; (3) symbol with "Humsafar" and, below it, the Urdu "ہم سفر" in Nastaliq style. Keep the text clean and correctly spelled.
```

App icon prompt

```
Turn my chosen Humsafar symbol into an Android app icon: a 1024 x 1024 square with rounded corners, solid teal-blue #0E7490 background and the symbol in white (with the small amber #F59E0B accent if it has one), centred and filling about 60 % of the square so it survives circular and squircle masks. Also show the same icon at small size (48 px) next to it to check it is still clear. No text.
```

Refine prompts (after you pick a favourite)

```
Refine this one: keep the idea but make the shapes simpler and the strokes thicker so it reads at 48 px. Show 4 versions: full colour on white, white on teal-blue #0E7490, one-colour dark teal #155E75, and black only. Then show it in a phone home screen next to other app icons to check it stands out. If anything looks like a hospital, an eye, a camera or uses red, remove it.
```

10. Hand-back checklist for the designer

File	Where it goes in the repo
Source files (.ai / .fig / .svg master)	assets/brand/logo/source/
Exports: SVG + PNG (1024, 512, 192, 48 px), each version	assets/brand/logo/exports/
Android adaptive icon (foreground + background, 1024 px)	assets/brand/app-icon/
Final slogan (EN + UR) and short brand rules	assets/brand/README.md
Gemini concept images worth keeping	assets/brand/concepts/
