HUMSAFAR · QA

ICP-1 Results: Identity & Access

Integration checkpoint 1 · v1.1 · prepared by Syed Sarim Jawad Zaidi (QA) · test runs 26–29 Oct 2026

22 / 23	0	1	0
steps passed	failed	partial (cosmetic, 1.8)	backend bugs

1. Summary

ICP-1 checks the full identity flow in the real app against the hosted backend: register, verify, KYC, link a Dependent, invite Secondary Guardians and set permissions. **22 of 23 steps passed.** Step 8 failed on 1.5 (Share my ID disabled, **High**); the fix shipped in 1.6 and step 8 passed on re-test with 1.7, together with step 11. Step 22 is a partial pass until the 1.8 retest.

The backend behaved correctly in every step. All findings are on the app side, and every finding above Low already has a fix.

1.1 Verdict

Pass rule (from the ICP-1 script)	Status
Steps 1, 4, 5, 7, 9, 13, 14, 17, 18 must pass	PASS
Step 11 must pass	PASS
No Critical / High bug open	PASS

ICP-1 is passed and signed off by Abdullah (29 Oct 2026) at 22 / 23, with no Critical or High bug open. Step 22 stays **partial** until the 1.8 retest. Fix and retest in 1.8: the Home title, the Logout padding, the Urdu button labels and the KYC title cut.

2. Set-up

Item	Detail
Backend	Hosted on Render (humsafar-api-s851.onrender.com), team repo dev at PR #83. Push = mock provider; SMS = mock (server log).
App builds	Talha's debug APKs debug-apk-1.4 to 1.7 (repo humsafar-talha-frontend). 1.8 not yet released.
Test fakes	Phone OTP 123456; KYC fails for a CNIC ending in 0.
Testers	Sarim (Ali, Sara, Bilal, Extra Guardian), Talha (Ammi), Abdullah (API checks with Swagger).
Password	One shared test password from Abdullah; not written in this report.

2.1 Test accounts used

Person	Role	Email	Phone
Ali Khan	Primary Guardian	ali.test@humsafar.dev	0300 1110001
Ammi	Dependent	ammi4.test@humsafar.dev	—
Sara Khan	Secondary A	sara.test@humsafar.dev	0300 1110002
Bilal Ahmed	Secondary B	bilal.test@humsafar.dev	0300 1110003
Extra Guardian	4th Guardian (cap test)	extra.test@humsafar.dev	0300 1110006
Verify test	Fresh Guardian for step 4	verify.test@humsafar.dev	0300 1110008
Nasreen ("Nani")	2nd Dependent, step 8 re-test	nani2.test@humsafar.dev	0300 1110023

Ammi's email is ammi4.test instead of ammi.test because of earlier setup attempts. This is harmless; use ammi4.test in ICP-3 and ICP-4. Phones 0300 1110005, 1110007 and 1110008 were already taken on the server, so Nani uses nani2.test and 0300 1110023. Nani is now linked to Ali and can be used for Dependent switching.

3. Step results

#	Step	Tester	Build	Result	Note
1	Ali creates a Guardian account	Sarim	1.4	PASS	Account created; landed on "Verify your account"
2	Register again with the same email	Sarim	1.4	PASS	"Already registered" error; nothing new created
3	Wrong data: bad email, 2-digit phone, short password	Sarim	1.4	PASS	Field errors shown; nothing saved
4	Verify phone: wrong code, then 123456	Sarim	1.5	PASS	Ali was already verified, so run with a fresh Guardian (verify.test). Wrong code refused; 123456 verified
5	Ammi creates a Dependent account, tries to log in	Talha	1.5	PASS	Login blocked until KYC and linking
6	KYC with a CNIC ending in 0	Talha	1.5	PASS	"Failed", retry offered
7	KYC with the valid CNIC + live photo	Talha	1.5	PASS	Verified; "waiting for your Guardian"
8	New Dependent opens Share my ID after KYC	Sarim	1.7	PASS	Re-test with a new Dependent (nani2.test): View & Share My ID enabled; QR and ID shown; copied ID linked her to Ali. Failed on 1.5 (F-01)
9	Ali links Ammi with her ID	Sarim	1.5	PASS	Linked as Primary; Ammi in Ali's list (ID pasted, as step 8 was blocked)
10	Ali links Ammi again	Sarim	1.5	PASS	"Already linked" message
11	Ammi logs in after linking	Sarim	1.7	PASS	Dependent home with Panic / I am OK / My medicine; Share my ID in More shows her correct ID
12	Extra Guardian tries to link Ammi as Primary	Abdullah	API	PASS	Refused: one Primary only
13	Ali invites Sara and Bilal	Sarim	1.7	PASS	Both invites sent
14	Sara and Bilal accept	Sarim	1.7	PASS	Both shown as Secondary under Ammi (Bilal had to verify his phone first)
15	Extra Guardian tries to join as a 4th Guardian	Sarim	1.7	PASS	Refused: 1 Primary + 2 Secondary limit
16	Sara tries to invite someone	Abdullah	API	PASS	Not allowed
17	Ali opens Permissions	Sarim	1.7	PASS	Sara and Bilal start with everything OFF
18	Ali turns ON 4 modules for Sara	Sarim	1.7	PASS	Saved; Sara's "My access" shows them at once
19	Sara tries to change her own permissions	Abdullah	API	PASS	Not possible (read-only)
20	Ali turns OFF Sara's live_location; Sara opens Live Map	Abdullah	API	PASS	403 MODULE_ACCESS_DENIED
21	Ali tries to delegate Remote Alarm to Sara	Sarim	1.7	PASS	Not offered (Primary only)
22	Aa and EN | UR on every screen; switch to Urdu	Sarim	1.6/1.7	Partial	Text switches and flips right-to-left. Buttons still in Naskh in high contrast (F-03), fix in 1.8
23	Ali logs out and logs in again	Sarim	1.7	PASS	Session restored. Logout did not exist before 1.7 (F-02)

4. Findings

Severity: **Critical** blocks a safety feature; **High** blocks a core flow; **Medium** breaks a feature but has a work-around; **Low** is cosmetic or a demo polish item.

ID	Finding	Severity	Step	Fix / owner	Status
F-01	Share my ID disabled after KYC: a verified Dependent cannot show her QR or copy her ID, so a Guardian cannot link her from the app	High	8	Fixed in 1.6 (commit 1f8d6cf); re-tested on 1.7	Verified
F-02	No Logout in the app before 1.7	Medium	23	Added in 1.7	Verified
F-03	Urdu font in high contrast: text fell back to a Naskh font. Cause: high-contrast text styles set without the base font (labelLarge in _scaledTextTheme)	Medium	22	Body text fixed in 1.6. Button labels: fix and retest in 1.8 (commit 10cf0d4)	Retest in 1.8
F-04	Guardian's Dependents list shows the email instead of the name	Low	9	API has no full_name there yet; Abdullah adds it later	Open
F-05	App bar title cut off on the Guardian home	Low	22	Title changed to "Home": fix and retest in 1.8	Retest in 1.8
F-06	Logout row hidden behind the bottom nav bar	Low	23	Padding fix: fix and retest in 1.8	Retest in 1.8
F-07	App opens on a developer shortcut screen instead of Welcome	Low	1	Remove before the demo build	Open
F-08	Default Flutter app icon instead of the Humsafar icon	Low	—	Icon files ready in assets/brand/app-icon/ (PR #83); wire in with flutter_launcher_icons	Open
F-09	KYC screen title cut off ("Dependent Verification (KY...")	Low	8	On Talha's 1.8 list: fix and retest in 1.8	Retest in 1.8

4.1 Observations (not bugs)

- **Bilal was not verified at first.** He had to verify his phone before he could accept the invite. This is the correct behaviour. **Checked again on 1.7 (29 Oct):** Ammi's Linked Guardians list shows Ali, Sara and Bilal all as **Verified**, matching the server.
- **Open alerts on Ammi's account:** one Panic from 10:51 PM on 27 Oct and three "Phone offline" alerts, left over from testing. No SMS was sent because no emergency contact was set. **Talha clears these from Ammi's side before ICP-3**, so ICP-3 step 1 starts with no open alerts.
- **Backend:** no bugs found. Refusals (one Primary, Guardian cap, read-only permissions, 403 MODULE_ACCESS_DENIED) all came back with clear codes.

5. What is left

Item	Who	When
Fix and retest in 1.8: Home title (F-05), Logout padding (F-06), Urdu button labels (F-03, step 22), KYC title cut (F-09)	Talha fixes, Sarim retests	When 1.8 is released
Clear the old Panic and "Phone offline" alerts	Talha	Before ICP-3
Show the Dependent's name instead of the email (F-04)	Abdullah, then Talha	Later
Wire in the Humsafar app icon; start on Welcome (F-07, F-08)	Talha	Before the demo build

5.1 Change log

Version	Change
v1.0	First write-up: 20 / 23 passed, step 8 FAIL, step 11 pending, step 22 partial.
v1.1	Step 8 and step 11 re-tested on 1.7: PASS. F-01 verified. Added F-09 and the Nani account. ICP-1 signed off by Abdullah (22 / 23). F-03, F-05, F-06 and F-09 marked "fix and retest in 1.8". Bilal's verified status checked in the app.
